

**Product:** RobotSaver™ 4000 Paint Robot Cover is used by industrial paint shops to protect UBC/Seam Sealer/Paint booth robots from overspray, drips and other contaminants. The standard product is transparent, fire-retardant & antistatic so that it can be used safely in a paint shop environment. It is also available in a variety of other materials and surface treatments can further enhance its existing properties. Moreover its fabric-free construction eliminates the primary source of fiber contamination from conventional fabric covers. The RobotSaver™ can be changed quickly during normal production breaks, and its multipart design allows for replacement of various sections at differing intervals.

**Benefits:** Fire-retardant  $\geq$ UL-94VTM-2.  
Antistatic  $\leq 10^{11}\Omega$ /square.  
Fiber-free construction.  
Quick change replacement & disposal. No chemical cleanup or laundry required.  
Venting eliminates potential “sweating” or humidity accumulation  
Sectional design reduces replacement frequency.  
Transparency facilitates troubleshooting during normal production.  
Zippered construction allows quicker access for immediate repairs.

**Usage:** RobotSaver™ 4000 covers are custom designed for each robot. Remove and replace each piece, or entire set, as needed.

**Part #:** M14000 Clear  
M14008 Matte
