

**Product:** BoothSaver™ 3010 Resizable Tacky Mat is used on floors in high traffic areas such as air showers and booth entrances to capture loose dirt, fibers and paint particles before they can become paint defects. They may also be used in Feather Duster areas and Robot Zones to capture falloff and spills in order to reduce cleanup and prevent dirt seed contamination. Each mat contains 30 numbered layers that can be easily peeled away to reveal a fresh tacky surface as needed. These tacky mats are designed for “one size fits all” applications.

**Benefits:** Tacky surface attracts and holds dirt seeds.  
 Double tabbed. Can cut into TWO usable mats.  
 30 layers per pad.  
 Residue free high peel force release adhesive on bottom layers adheres itself to floors.  
 Solid non-hazardous, PVC-free disposal.

**Usage:** BoothSaver™ 3010 Resizable Tacky Mats are available in standard sizes below. To use:

- If necessary, cut pad to size using razor knife and straight edge.
- Thoroughly clean area where the tacky mat will be used.
- Remove the thin protective clear layer from the back of the pad to expose the adhesive.
- Place the pad in desired location and press pad down firmly. If needed, the pad can be lifted and adjusted for re-placement.
- Remove numbered layers as required to retain a tacky surface.
- When #30 layer is used, remove entire pad and replace. Dispose of properly

**Packaging:**

Part #	Color	Size (in)	Size (m)	Sheets/ Pad	Pads/Box
M17022B-2448	Blue	24" x 48"	0.61m x 1.22m	30	10
