

Product: BoothSaver™ 2043 Clear Matter Antistatic Equipment Film is used to protect paint booth robots and equipment from overspray. This film is paint-shop safe, with self-extinguishing fire retardancy and antistatic properties that safely dissipate electrostatic buildup. This product is not self tacky, so it is easy to unroll and adjust position. A typical use for this product is to quickly cover and protect the conveyor assembly and shroud.

Benefits: Use for conveyor shrouds and robot rails.
Self-extinguishing fire retardancy.
Antistatic Surface Resistivity $\leq 10^{11}\Omega$.
Flexible for additional tolerance with moving parts.
Physical barrier that is impenetrable to even the heaviest overspray.
Easily put in place and easily removed. No chemical cleanup needed.
Solid non-hazardous waste. Easy disposal.

Usage: BoothSaver™ 2043 roll can be cut to size in paint booth and fastened to equipment with tape such as BoothSaver™ 2049 Release Tape. Equipment should be completely wrapped in film. Remove and replace as needed.

Packaging: M17043-69-100 (1.53m x 1000m)
