

Product: BoothSaver™ 2044 Flame-Retardant Antistatic Equipment Film is used to protect paint booth robots and equipment from overspray. This film is paint-shop safe, with self-extinguishing fire retardancy and antistatic properties that safely dissipate electrostatic buildup. This product also exhibits excellent clarity, flexibility, and self-clinging properties that make it especially suitable for protecting process equipment.

Benefits:

- Self-extinguishing fire retardancy. (UL VTM-0)
- Antistatic Surface Resistivity $\leq 10^{11}\Omega$.
- Flexible for additional tolerance with moving parts.
- Physical barrier that is impenetrable to even the heaviest overspray.
- Easily put in place and easily removed. No chemical cleanup needed.
- Crystal clear- can be used on windows.
- Flexible enough to use on moving robots.
- Solid non-hazardous waste. Easy disposal.

Usage: BoothSaver™ 2044 roll can be cut to size in paint booth and fastened to equipment with tape such as BoothSaver™ 2049 Release Tape. Equipment should be completely wrapped in film. Remove and replace as needed.

Packaging: M17044-48-200 (0.10mm x 1.22m x 200m)
M17044-72-100 (0.12mm x 1.83m x 100m)
