

2048 Woven Walkway Film

Product: 2048 Woven Walkway Film is a multilayer film with a woven polyolefin core layer that exhibits excellent durability to foot and equipment traffic. The surface layers are antistatic. Moreover, the film contains an aluminum core layer that can be used with grounding clips to ensure quick static dissipation. The film is non-adhesive, chemical resistant, and environmentally friendly. It can be easily cleaned during routine maintenance periods. This white film protects from overspray, dirt buildup and paint tracking.

Benefits:

- Mops clean easily.
- Safe electrostatic dissipation.
- Easy application and residue free removal.
- Protects floors & walls from contamination.
- Resistant to most paint shop chemicals.
- White film improves visibility and brightness.
- Solid non-hazardous waste disposal.

Usage: Roll can be cut to size in paint booth and fastened to equipment with tape. Equipment should be completely wrapped in film. Remove and replace as needed.

Size: 60" x 55yds (1.53m x 50m)
